## APPOINTMENT SENIOR ANALYST AND HEAD OF RESEARCH

**Archipelago Investments is pleased to announce the appointment of seasoned investment professional Anders Fagerlund as Senior Analyst and Head of Research. Fagerlund will lead the firm's analytical framework, bringing nearly three decades of extensive institutional experience in equity research and portfolio management.**

Anders Fagerlund has previously worked at AMF Fonder, where he served as a Senior Fund Manager for 15 years. During his tenure, he established himself as a premier European equity manager, consistently earning 4- and 5-star ratings from Morningstar. His "value-driven" investment philosophy and rigorous focus on understandable business models and normalized cash flows resulted in outperformance against both benchmarks and peers.

Prior to his success as a buy-side manager, Fagerlund spent over a decade at UBS Investment Bank as an Executive Director and ranked Sell-Side Analyst covering the European Capital Goods sector.

In his new role as Senior Analyst and Head of Research, Fagerlund will be directly involved in conducting deep-dive research that forms the basis of Archipelago's investment decisions. His extensive expertise across the broad Industrials sector - specifically within Capital Goods sub-sectors- combined with his deep knowledge of European equities, will further strengthen the firm's ability to identify mispriced opportunities in the Nordic and European markets.

The appointment marks a professional reunion at Archipelago. **Anders Palmqvist, Managing Partner and CIO**, commented: *"I am personally thrilled to welcome Anders to the team. Having worked closely with him for over 10 years at UBS, I have seen firsthand his exceptional analytical depth and integrity. Anders is a 'stock-picker' in the truest sense. His ability to ignore market noise and focus on fundamental value creation is perfectly aligned with the concentrated, high-conviction strategy we run in our fund, Chelonia Select."*

**Magnus Angenfelt, Partner and Portfolio Manager**, added: *"Having Fagerlund join us is a tremendous asset. His deep expertise in the large and diversified Capital Goods sector and his 'valuation-first' mindset perfectly complement our strategy. At a time when passive indexing, like a rising tide lifts, all boats regardless of quality, Anders' experience in identifying structural losers and undervalued winners will be beneficial to Chelonia Select's alpha generation."*

*"Archipelago Investments' focus on fundamental analysis and its Value and GARP-focused investment process is the ideal environment for my style of investing,"* said **Anders Fagerlund**. *"I look forward to working with Magnus Angenfelt, and Anders Palmqvist yet again, and contributing to the continued success of the Chelonia Select fund."*
